

**All-in-one
Multi-Stage
Turkey Feeder**

Polyfeeder

This high quality and versatile feeder can be used in “All-in / All-out” buildings with the same feeder, and can be configured for either brooding or finishing!

Benefits:

- For turkey poults, chicks feed using the lower part of feeder
- During the finishing stage, adult birds use the top of the feeder
- For either the poult or adult stage, feed can be precisely adjusted
- After 6 to 8 weeks, the bottom pan (used for weaning) can be removed for the grow-out cycle.

Patent: The unique patent pending “Open/Close” valve design is the heart of the feeder and can be used for either brooding or finishing.

The Polyfeeder is made in Italy & distributed by INDIV in partnership with Giordano Poultry Plast
